## Professional Summary

---

Dynamic Full Stack Developer specializing in crafting scalable, user-centric platforms. Experienced in optimizing educational systems, enhancing digital workflows, and delivering swift solutions. Notable projects include Learn Place, My Inbox, and Food Ordering Integration, benefiting thousands across diverse industries.

## Experience

---

**Full Stack Developer**, WorksNet Tech Innovation October 2024 – Present

- Enhanced educational platforms by automating tasks and improving student experiences, leading to a 20% increase in school admissions.
- Developed an email summary tool within 24 hours, saving users over 60 minutes daily and improving productivity for thousands.

**Software Developer Intern**, WorksNet Tech Innovation April 2024 – September 2024

- Enhanced user experience by developing web applications and implementing scalable technology in 5 major schools, benefiting over 2,500 students and 75 teachers within 3 months.
- Contributed to a scalable multi-tenant product for web and mobile platforms, capable of expanding to over 1,000 schools.

## Projects

---

### Learn Place ([learnplace.in](https://learnplace.in))

- Streamlined education by developing an innovative platform that minimizes theoretical teaching time. By automating daily tasks and integrating social media, it significantly enhances the overall student learning experience and supports schools in admissions growth and expansion.
- Constructed using React.js and Django, collaborated with team tools like GitHub, Slack, Jira, and tested APIs with Postman for seamless integration and project management.

### Food Ordering Integration ([menu.easify.xyz](https://menu.easify.xyz))

- Created a comprehensive food ordering system adopted by over 5 eateries and cafes. The platform facilitates over 50 daily orders through WhatsApp with a user-friendly interface, allowing customers to easily access menus and place orders swiftly via QR codes.
- Engineered responsive features with HTML5, CSS3 frameworks alongside JavaScript libraries using React.js while ensuring deployments through GitHub workflows integrated with Azure DevOps for enhanced efficiency.

### My Inbox ([myinbox.worksnet.in](https://myinbox.worksnet.in))

- Developed "My Inbox," a secure platform designed to meet the needs of busy individuals by providing efficient daily email digests. The service guarantees no important emails are missed and features a quick 30-second signup process, saving users over an hour every day.
- Leveraged Next.js, Node.js, Express.js, and MongoDB to deploy the platform within 24 hours, utilizing GitHub and Azure for support and hosting.

## Education

---

**Lakshmi Narain College of Technology (LNCT), Bhopal**  
*Master of Computer Application (MCA)*

*Sept 2023 – Jun 2025*
